

900 ENTRANCE SYSTEM

Benefits of the 900 PVC Entrance System

- Kohltech High Performance Sill System, DP100 (for water), that meets and exceeds the new NAFS Standard of the Canadian Building Code for Energy Efficiency and Structural Strength.
- PVC rosettes & casings available
- Stainless steel adjustable striker plates
- Heavy duty PVC multi-chamber frame
- High energy efficiency
- Complete maintenance-free door system, inside and out.
- Custom options and sizes available
- Fusion welded construction

The strength and durability of the 900 PVC Entrance System, combined with the extensive selection of options, launch this door system into a league of its own.

Kohltech is one of the original manufacturers of all-vinyl window and door systems in Canada and its products have been the preferred choice of quality-conscious architects and contractors for over three decades. Kohltech uses only premium quality vinyl extrusions, heavier wall frames, the most efficient insulating glass and the most reliable hardware products. Our commitment to quality creates a difference that is particularly noticeable in Kohltech's 900 PVC Entrance System.
